

Stonewall Jackson Unit Swim Classification Record

This is the individual's swim classification as of this date. Any change in status after this date (i.e., nonswimmer to beginner or beginner to swimmer) would require a reclassification test performed by an approved test administrator. The administrator must be pre-approved by the SJAC Aquatics Committee. The administration should meet one of the following criteria: Aquatic Instructor BSA; Aquatics Supervision, Swimming and Water Rescue; approval by SJAC Aquatics Committee.

SPECIAL NOTE: The Camp Shenandoah aquatics director retains the right to review or retest any or all participants to ensure that standards have been maintained.

SWIM CLASSIFICATION PROCEDURES

The swim classification of individuals participating in a Boy Scouts of America activity is a key element in both Safe Swim Defense and Safety Afloat. **The swim classification tests should be renewed annually, preferably at the beginning of each outdoor season.** Traditionally, the swim classification test has only been conducted at a long-term summer camp. However, there is no restriction that this be the only place the test can be conducted. It may be more useful to conduct the swim classification prior to a unit going to summer camp.

All persons participating in BSA aquatics are classified according to swimming ability. The classification tests and test procedures have been developed and structured to demonstrate a skill level consistent with the circumstances in which the individual will be in the water (e.g., the swimmer's test demonstrates the minimum level of swimming ability for recreational and instructional activity in a confined body of water with a maximum 12-foot depth).
